FROZEN PLASMA – Artificial

Street date: April 25, 2006

Nilaihah Records - nr030

Full length CD - 12 tracks

file under: Electronic Industrial, EBM, SynthPop

From the ashes of NamNamBulu arise one of the most talked about electro bands of 2006. Vasi Vallis (NamNamBulu and Reaper) joins forces with singer Felix Marc (Diorama). Initial contact was first made during the European VNV Nation 'Formation Tour,' where Vasi (keyboards for VNV Nation) and Felix (keyboards & background vocals for Diorama) first met. After this, things took off! Their first single 'Hypocrite,' was released in late 2005, with their first full length album to follow on April 25, 2006. These guys are on the move!

" Following the demise / split of Euro Electro-Pop sensations Namnambulu, it was easy to predict that follow up project FROZEN PLASMA would return with more energy and infection synth-tuned popper than ever before! After scoring a huge underground hit with the dancefloor single "Hypocrite", they return now with a brand new full length album "Artificial". With new singer Felix Marc (of DIORAMA) now incorporated into the line-up, sound mastermind Vasi Vallis (Namnambulu/Reaper) delivers 12 tracks and 75 minutes of mature, dreamy electro-pop - brimming with synth-led melodies across high class tracks such as "Irony", "Crossroads", "Generations Of The Lost" and "Condense". Presented in the usual trademark minimalistic artwork, "Artificial" contains all the ingredients to become another big hit within the electro-pop scene!!" --Infacted Recordings
