"synthetic music for synthetic people"

Street date: July 24, 2007
Nilaihah Records - nr032

Full Length CD - 11 songs

file under: Electronica, World Music, Drum 'n Bass, Breakbeat

Building on concepts explored in their previous releases A Million Different Moments and The London EP., Null Device return with deeper explorations into their blend of angular electronica and various elements of world music. Instrumentations and styles from India, Persia, and the Middle East blend with a mix of breakbeat, techno, downtempo and even electro dance. Null Device, once again, refuses to be pigeonholed. "Excursions" promises to be one of this year's more diverse albums on the independent electronic music landscape. Their finest release to date, so immerse yourself into beats, melodies, and atmospheres that you won't soon forget...

Null Device's long-awaited third album **EXCURSIONS** combines Electronica, Pop, Breaks, EBM, and Trance with a varied new toybox of influences from Bhangra to Bollywood to Flamenco. Excursions is Worldbeat for people who hate Worldbeat; club music for people who love club music, but hate hearing the same old fluff.

In short, Excursions is an evolution of sound for Null Device, bringing together the complex musical elements that they have been applauded for but with an overall accessibility only hinted at in previous releases. This is Null Device's finest release to date, so immerse yourself in beats, melodies, and atmospheres that you won't soon forget... -- DJ EUROTIC, *The Inferno*
